Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Hoffelner (GB 2 304 158). Hoffelner discloses a brush seal with a bristle arrangement (B) having a retention section (3). There are a pair of plates (4, 5) flanking the bristle arrangement and having a clamping section (Figure 1) to frictionally engage the retention section. Movement of the retention section is prevented after the plates are secured together and movement would inherently be allowed prior to securing the plates together.

The clamping section is a channel.

The width (taken horizontally across Figure 1) of the channel corresponds to the width of the retention section. The length (taken vertically across Figure 1) of the channel is greater than the length of the retention section.

The channel is located on both of the plates (4, 5).

The seal meets the recitation of a bristle ring.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 13-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hoffelner, as applied above. Packing rings and labyrinth seals having brush seal segments are well known. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have used the brush seal segment of Hoffelner as part of a packing ring or labyrinth seal in order to obtain optimum sealing in a particular application, in accordance with the teaching of Hoffelner.

Regarding the method claims, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have used the steps claimed in order to properly assemble the apparatus of Hoffelner.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary Hartmann whose telephone number is 703-305-4549. The examiner can normally be reached on Monday through Friday, 9am-6pm.
